Education

Kalinga Institute of Industrial Technology

Bachelor of Technology in Computer Science Engineering.

2023-2027

Bhubaneswar, Odisha

Experience

Soshals — Software Development Intern

Feb 2026 – May 2026

- Built 3+ automated workflows using LLM APIs, n8n, and Google Apps Script, cutting manual tasks by 80%.
- Sped up core business processes by 5x through seamless API orchestration and custom automation.
- Streamlined content and data pipelines to maintain 99% uptime, saving the team 10+ hours per week in manual oversight.

UiPath Student Community KIIT — Technical Executive

July 2025 – Present

- Collaborated on automation and data analytics projects using UiPath and Python, delivering workflow-based solutions for real-world use cases.
- Analyzed structured datasets to extract insights and improve process efficiency across student-led initiatives.
- Deployed 5+ RPA workflows to production, directly improving event management and ops for 500+ students.

Projects

E2E AI Video Generation Pipeline | n8n, Arcads API, OpenAI API, Slack, OAuth2, JavaScript

Feb 2026

- Orchestrated an asynchronous data ingestion pipeline utilizing the Reddit API to eliminate 100% of manual content sourcing, successfully processing 500+ daily posts via custom signal-based thresholds (over 85% upvote ratio).
- Accelerated content turnaround time by 95% (from 3 hours to 8 minutes) by engineering a multi-stage ETL workflow seamlessly linking NLP relevance filtering, LLM prompt chaining, and AI video synthesis.
- Synthesized platform-ready scripts for 3 distinct mediums (Reels, Shorts, TikTok) with zero human intervention by deploying an LLM-driven scriptwriting module utilizing prompt templating.

NagarMitra | React, Express.js, Telegram Bot, LLM APIs, ElevenLabs

Oct 2025

- Spearheaded the development of a full-stack geospatial application (React Native, Node.js, AWS) to track 10+ civic issue categories, enhancing municipal visibility via GPS-tagged submissions and real-time ward-wise heatmaps.
- Slashed manual complaint triage effort by 70% by integrating an LLM-powered classification microservice ("Mitra AI"), automatically categorizing and routing civic grievances with an 88% accuracy rate.
- Secured 3rd place at the Hack4Impact SDIS 2026 hackathon by designing a horizontally scalable, modular REST API backend on AWS that enabled a multi-channel reporting interface across a mobile app and Telegram bot.

Pashu Mitra — Animal Welfare Platform | Node.js, MongoDB, Google Maps API, Botpress, ElevenLabs

Nov 2025

- Expanded animal welfare reporting access for non-technical rural users by architecting a full-stack platform (React, Node.js, Python, AWS) featuring NLP-driven localization across 26+ distinct Indian languages.
- Streamlined livestock symptom analysis to achieve a 3-second response latency by formulating a real-time disease alert system and AI health chatbot, optimizing execution via efficient LLM API call chaining.
- Outperformed 550+ competing teams to advance to the Smart India Hackathon 2025 National Semi-Finals by delivering a production-grade system rigorously validated by a national-level technical jury.

Achievements & Certifications

SIH 2025: 2nd Place among 550+ teams; advanced to national semi-finals (SIH25006).

PashuMitra

Hack4Impact (SDIS 2026): 3rd Place for NagarMitra — GPS pipeline, heatmaps, Telegram bot, LLM classifier.

NagarMitra

Pandora's Paradox (KIIT E-Summit 2025): Special Team Recognition.

Spendora

Google x Kaggle GenAI Agents: Earned Google badge; shipped **Studifyy** -AI productivity platform.

GoogleXKaggle

Google Cloud: Gen AI Learning Path, LLMs, Responsible AI, AI Principles.

AWS: Data Engineering, Cloud Foundations. UiPath: Agentic Automation, Top 30.

Technical Skills

Languages: C, C++, Python, JavaScript, TypeScript, HTML, CSS, SQL.

Frameworks & Libraries: React, React Native, Node.js, Express.js, REST APIs.

Developer Tools: Git, GitHub, VS Code, Postman, Chrome Extensions, Google Apps Script.

Cloud & DevOps: AWS (S3, Lambda, Glue, EC2), Google Cloud Platform, Cloud Deployment, ETL Pipelines.

AI & Automation: LLM APIs, n8n, Workflow Orchestration.

Core CS: DSA, OOP, DBMS, Operating Systems, Algorithm Optimization, Complexity Analysis.
